PROFILE SUMMARY

Senior Software Engineer with 5+ years of experience in full-stack Java development, specializing in Spring Boot, Microservices, and RESTful APIs. Proven expertise in performance optimization, scalable service design, and large-scale data integrity projects using Kafka and RabbitMQ. Skilled in frontend development with React, JavaScript, and TypeScript, complemented by strong backend engineering. Experienced in cloud-native deployments (Docker, Kubernetes, CI/CD) and implementing security best practices. Adept at unit/integration testing (JUnit, Mockito) and driving early bug detection to ensure high-quality deliverables. Passionate about leveraging AI-driven solutions and modern architectures to enhance workflows and system reliability.

EDUCATION

Bachelor of Engineering in Computer Engineering, Dr. D Y Patil Institute of Technology Pune

Jul 2021

CGPA: 8.84

PROFESSIONAL EXPERIENCE

Nitor Infotech - Senior Software Engineer

Aug 2025 - Present

- **Data Integrity & Measurement Platform:** Working on a large-scale data management platform for multiple clients, ensuring accurate handling and organization of millions of records. Designed and implemented scalable services to optimize performance, while integrating Kafka and RabbitMQ for reliable, real-time messaging and data flow across distributed systems.
- **API Development:** Designed and implemented secure, scalable RESTful APIs using JAX-RS, enabling seamless data access for web and mobile clients.
- **Migration & Modernization:** Directed migration projects including Spring Boot 4 upgrade and Jackson 4 adoption across DO services, ensuring compatibility and improved maintainability.
- **Early Bug Detection:** Built robust components and integration tests (IT) to catch defects early in the development cycle, reducing production issues significantly.
- **Java Performance Engineering:** Optimized codebase through multithreading, parallel processing, Batching and refactoring, achieving a 20% reduction in execution time.
- **AI Integration:** Engineered and integrated AI-driven personalized skills with MCP server architecture, streamlining workflows and elevating output quality.
- **Batch Processing Automation:** Developed and maintained Spring Batch and Quartz-based systems, automating complex data workflows and ensuring timely delivery of reports.
- **Quality Assurance:** Applied TDD practices with JUnit and Mockito, strengthening reliability and maintainability across the SDLC.
- **Code Quality & Standards:** Actively participated in code reviews, enforcing best practices and maintaining high-quality deliverables.
- **Security Implementation:** Applied authentication, authorization, and encryption standards to safeguard sensitive data.

Volkswagen IT Service - Software Engineer

Dec 2023 - Jul 2025

- Developed various APIs using Java 8, Spring Boot, Microservices, and REST API.
- Contributed to web application development and Azure cloud solutions.
- Utilized testing frameworks such as JUnit and Mockito, adhering to TDD principles, with experience in JavaScript, HTML, CSS, and jQuery.
- Demonstrated a strong understanding of the Software Development Life Cycle (SDLC), particularly the SaFe Agile methodology.
- Managed source control and version management for all code and resources using Git.
- Worked with front-end technologies including React.
- Gained exposure to Kafka and DevOps tools such as OpenShift, Bamboo, Jfrog, and Kubernetes.

Accenture - Application Development Analyst

Dec 2021 - Dec 2023

- Applied technologies including Java/J2EE, Spring, ORMS, MySQL, HTML, CSS, and OOP concepts.
- Gained experience in banking and finance domains, with exposure to AWS services.
- Performed development and unit testing in collaboration with business stakeholders.
- Integrated software with existing systems.
- Familiar with web services (SOAP/REST) and build tools like Maven.

DXC Technology - Associate Professional Software Engineer

Jul 2021 - Dec 2021

- Contributed to backend software development, bug fixing, and unit test execution across core Java applications.
- Collaborated with cross-functional teams to adhere to clean code standards and core object-oriented programming principles.

SKILLS

- Core Backend & Programming: Java (8/J2EE), Spring Boot, Spring Framework, Microservices Architecture, REST/SOAP APIs, GraphQL, Hibernate/JPA, Node.js, JUnit, Mockito, TDD, Jackson
- Cloud & DevOps: Azure Cloud Services, AWS, Docker, Kubernetes (K8s), OpenShift, Jenkins, GitLab CI, Git, Bamboo, JFrog Artifactory, CI/CD Pipeline Automation
- Databases & Messaging: MySQL, PostgreSQL, MongoDB, NoSQL, Redis, Apache Kafka, RabbitMQ
- AI & Emerging Tech: MCP (Model Context Protocol), AI Integration, AI Agents, Prompt Engineering
- Front-End Technologies: React, AngularJS, JavaScript, HTML, CSS, jQuery
- Methodologies & Architecture: SDLC, SAFe Agile, OOP Concepts, Application Development & Frameworks

CERTIFICATION

- Microsoft Certified - Azure Fundamental (AZ-900)
- Microsoft Certified - Azure Developer Associate (AZ-204)
- Google Cloud Certified - Associate Cloud Engineer (ACE)
- Cloud DevOps Certification - Upgrad
- Apache Kafka Foundations and Development
- Generative AI Level 101
- GitHub Copilot GenAI Persona: Platform Engineering
- Front-end Development with React
- Full Stack Observability New Relic
- Aws Cloud Computing 101
- Python 101 for Data Science
